- Running
- Walking
- Nature
- Costumes
- Giving Back to the Community

MARKETING SUMMARY

WHAT IS THE DESIRED OUTCOME?

The desired outcome for this event is to raise money for local food banks.

SWOT ANALYSIS

WHAT IS THE OVERALL MARKETING STRATEGY?

The overall marketing strategy will consist of:

- advertisements via radio stations, flyers/posters, and banner ads
- social media marketing focusing on Facebook and Instagram platforms
- SEO best practices
- updating the Deltona website to reflect the addition of the event

PRE-EVENT PROCESS

Continuous efforts need to be put forth in order to maintain a strong web and social media presence for this event to succeed; this will be done through constantly creating and updating content through the Deltona website as well as through social media accounts.

FREQUENT POSTING

Social media announcements should be made at least two months prior to the event date with weekly or bi-weekly follow-up announcements. The social media accounts should maintain professionalism when posting any content and content should be eye-catching.

ENGAGING THE AUDIENCE

We want to connect with people on a more personal level; this can be done by responding to comments or questions on posts with multiple users to create conversation and provide answers.

USING LINKS

When using our social media accounts, it is important to include links to the city of Deltona's website as well as provide calls-to-action.

USING HASHTAGS

Using hashtags can help increase the overall social media presence for the event by making content easily available to anyone interested in a specific topic, allowing for our target audience to be reached.

UPDATING

The website should be updated regularly to ensure search engine optimization; this includes updating any time-related content such as scheduled events, broken links, gallery pictures, contact information, and general content.

USING LOCATION-SPECIFIC PHRASES

Because a little over half of mobile users account for web traffic, it is vital to include location-specific terms in keyword phrases to maximize traffic to the Deltona website. These location-specific terms should be used within the title and H1 tags to improve SEO.

E-MAIL MARKETING

Include a weekly or monthly newsletter updating users with new information and updated content. This is not only beneficial for this specific event but *all* events. The newsletters should provide an appealing design layout and be professional and concise, allowing for users to gain the necessary information without getting bored. The newsletters should also *always* provide a link to allow users to visit the website quickly and efficiently.

POST-EVENT PROCESS

SAY THANK YOU

Reach out to those who attended the event in a professional manner, simply thanking them for coming out to the event; this can be done through individual emails or broad social media posts.

POST-EVENT CONTENT

Display photos and videos from the event on the Deltona website and social media accounts. Posts on different social media accounts should *not* contain the same imagery.

PROJECT PLAN

BUDGET

- To be determined.

METRICS AND EXPECTATIONS

- Keep the overall bounce rate for the website under 40%; if the bounce rate is above 40%, adjust the calls-to-action. The bounce rate can be measured via Google Analytics.
- Increase engagement time on the website by 20%.
- Raise over \$1,000 for local food banks.
